

STYRENE PRODUCTS INC

Custom Foam Design & Fabrication

Architectural and Decorative Foam Shape Products (AFS)

Styrene Products Inc (SPI) has been offering high quality foam products for over 30 years and is now expanding our product line to include architectural and decorative foam shape products (AFS). AFS are designed to be coated with a variety of coating products, including authentic and synthetic Stucco® products. Once coated, the final product will provide a lightweight, cost effective, decorative accent to your project.

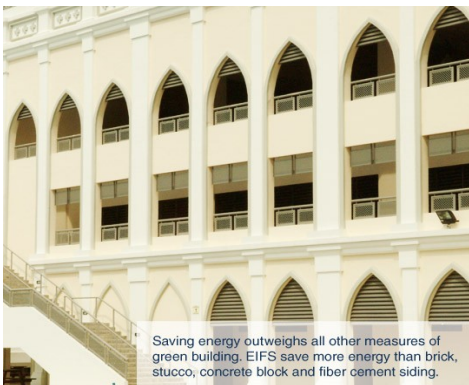

Styrene Products Inc architectural foam finishing products

AFS are used for commercial, institutional, and residential buildings and can be used in new construction, rehab, or remodeling of existing construction, and/or retrofit or replacement of existing parts.

AFS products are very popular for a variety of reasons:

- Seamless look (though control joints are required to prevent splitting from thermal expansion or contractions)
- Lightweight and easy to install
- Cost effective alternative to natural stone products
- Virtually limitless design potential provides for differentiation between projects
- Durable and will not rot
- Easily modified at job site
- Similar to EIFS Products

Saving energy outweighs all other measures of green building. EIFS save more energy than brick, stucco, concrete block and fiber cement siding.

AFS can be used on many different kinds of building such as homes, apartments, condominiums, high-rise buildings, offices, malls, shopping centers, hotels/motels, and more. Facades and soffits can also be created on these buildings, creating a decorative design like stone, or to create signage or artwork.

Not only can AFS be used on new buildings, but it is also installed on existing walls, called retrofitting. This is to upgrade the appearance and provide insulation.

SPI has standard products as well as the ability to run custom shapes and sizes as per request.

Architectural Foam Shape Products:

- Bases
- Capitals
- Columns
- Cornices
- Crown molding
- Fraize boards
- Headboards
- Quoins
- Sills
- Starter Corners
- Trims
- Wall caps

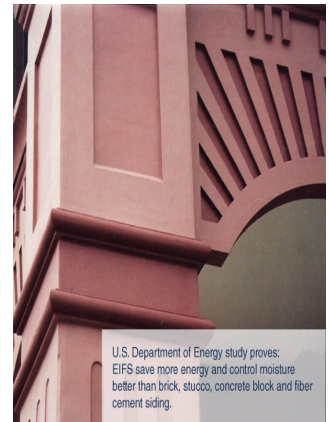

Pre-Coated Products offered:

- Bands
- Starter Boards

PLEASE NOTE!

SPI currently offers a limited range of pre-coated products. Considerations for expanding our pre-coated product line in the future are possible based on demand.

SPI encourages you to bring your unique requests that require creative design for architectural finishing. Our services include designing and sampling. So call today!

Benefits of AFS:

- Standard & custom shapes
- Available on-site delivery
- Differentiate your work from other contractors
- Lengths in 4' and 8' or as needed
- Available pre-coated (starter boards & bands)
